TAKOMO FITTING LAB · MEASUREMENT SHEET

Print at 100 % (actual size, no 'fit to page'). Then check the bar below with a ruler: it must be 100 mm.
Keep the sheet flat. All four black squares must be visible and sharp in every photo.

HAND: lay your lead hand flat down the middle of the sheet (covering this text is fine),
fingers together, wrist crease on the paper, no marker covered. Photograph straight down from 40-60 cm.

BODY: tape the sheet to a wall at chest height. Stand with your back flat against the same
wall, in golf shoes, arms hanging relaxed. A friend photographs you straight on from 3-4 m,
phone at waist height, whole body and the floor line in frame.
